

STEPHEN B. MORSE

Developing World-Class SE Leaders and Scalable SE Organizations

- Master key aspects of SE leadership and management skills to level up in your career
- Achieve work & life balance through dedicated mindfulness and Emotional Intelligence (EI) practices
- Grow your world-class SE teams and collaborate with peers at The SE Leadership Institute's events

“For me, the timing couldn't have been better to enroll in Stephen's leadership coaching services and technical SE bootcamp. As I transitioned into a leadership role, my SE organization doubled in size and it was clear to me that I needed to step up big-time and deliver...not just to my own SE teams, but also to the entire sales organization and company. Hiring a leadership coach gave me invaluable access to years of real-world management expertise that accelerated my professional development, and it helped me put up field goals which were critical to my success. Everything I learned from Stephen brings me not only confidence in becoming a better leader and advocate for the SE org, but also in being a trusted colleague who's now proven in delivering scalable strategy and lasting impact to my fellow executives and co-founders.”

Justin McManus
Director of Sales Engineering, mParticle

TECHNICAL WORKSHOPS, COACHING, MENTORSHIP, AND MINDFULNESS PRACTICES:

- Technical SE workshops on SaaS best practices, management, and leadership
- Mentorship programs for SE executives, managers, and teams of all levels
- 1:1 performance coaching to get your professional plan of action into gear
- Emotional intelligence and mindfulness practices for high-performing executives and company leaders
